Its been one hell of a ride on the way to reaching the heaven where dreams do come true remarkably only by pushing through whatever came spiraling our way to get where the crew envisioned to go. Looking back needless to say it was no easy ride at times even upon our legendary hard/soft tail lightning-fast bikes/scooters etc., in order to survive the adventure gaining and losing some along the way, nevertheless, let the results speak for themselves of some very one of a kind talented individuals who came together for Brotherhood/Friendship/Honor/Glory of the team.

On December 23, 2019 the call came in around 9:00 AM. Jeff will always be remembered as one of the best of us in soooo many ways having soooo many great qualities (Ex-Boxer/Cop) and talents (Badass Artwork of paintings, bronze, all kinds of unique one of a kind stuff specific to the biker industry for "Biker Old School" and so much more.) The crew was very fortunate to have him aboard and is/will be beside themselves for some time over the loss. The "Mountain Mans" unique artwork captures the vintage Harley Davidson spirit ridding along the local petroglyph sites and mountains.
