□ Lightning Fast Module (HD#225141513152119) □

Behold the first prototypes came in today. These "Lightning Fast Modules" are sure to become legends and put the Venomous Crew and those who have one of the collector's items on their bikes in touch with lightning fast power to help a bike out when it really needs it. Give a vintage Harley some extra "Special" zip with a set of wings! This secret project has been in development for some time one of which is sure to become legendary...

(We're thinking about creating something for the foreign bikes but nobody thinks they can handle the voltage!)
