A couple of the Venomous crew (Hank and Billy) got picked up by someone with photo radar at the Thunder Valley Rally for having the "Back to the Future Doc" in a side cart while being strapped to a "lightning fast" Venomous Motorcycle. Sure can tell by Hanks' hair/goatee there was a major rush to get to the rally of which lightning fast speed was reached, therefore, the need for the flux capacitor cart... Truly badass with a couple of legends!
